

Kubota®

CREATE A TISSUE BOX TRACTOR

- 1** Print out pre-colored or black & white tissue box craft. Color tissue box pieces (if needed) and cut out.

- 2** Glue top, sides & back pieces onto actual tissue box. Remember to add a hole for the tissues!

- 3** Fold both the "front" and the "front pop out" pieces along the fold lines. Glue the "front" piece onto the box, leaving the glue tabs folded out at 90° angle.

- 4** Place glue on the outside edge of the glue tabs and use those to attach the "front pop out" piece of the tractor.
